

I am a highly skilled Full Stack Developer with expertise in web development, specializing in frontend and backend technologies. I excel in creating robust web applications using frameworks like React for the front end and Node.js for the back end. With a keen eye for detail and a commitment to excellence, I ensure the delivery of high-quality solutions that exceed client expectations. I am proficient in version control using Git, enabling efficient collaboration and management. Additionally, I have hands-on experience in deploying applications on the Heroku platform for smooth and reliable deployments. My strong attention to detail, proficiency in frontend and backend development, and expertise in Git and deployment on Heroku enable me to create scalable and reliable web applications.

Experience

November 2022 - January 2023

Freelance E-commerce

Experienced full-stack developer with a strong focus on the MERN Stack. Successfully built a comprehensive and highly functional e-commerce website, allowing users to browse, search, and purchase products seamlessly. Implemented secure user authentication and JWT verification for safeguarding customer information. Integrated Stripe payment gateway for secure and convenient online transactions. Meticulously designed an intuitive user interface, optimizing the browsing experience and enhancing product discoverability. Prioritized performance and scalability to handle high traffic loads. Dedicated and eager to apply expertise in future ecommerce projects, including advanced payment integrations.

June 2023 - June 2023

Freelance Binance API

In my recent client project, I integrated the Binance API into a backend system, enabling seamless and secure trading functionality. This experience showcased my expertise in API integration, data retrieval, and real-time market updates within the backend architecture. Leveraging my strong knowledge of backend technologies such as Node.js and Express.js, I developed scalable and efficient solutions that precisely met the client's requirements. With a meticulous eye for detail and a focus on accuracy, I consistently strive to deliver high-quality solutions that exceed client expectations.

Education

October 2021 - Present

BS in Computer Science University of Education at College Road, Township

Certifications and Achievements:

- Alpha Ambassador Certificate Microsoft Learn Student Ambassador Program (MLSA)
- Team Member, GDSC 22-23 (Google Developer Student Clubs)
- Currently, team Member of Local Society from early 2022

Skills:

- Proficient in C++
- Strong understanding of data structures and algorithms
- Knowledgeable in software design principles

Key Skills

Feature Development MERN Stack
Data Sturctures and Algorithms in C++
Integration of third party API's
React Libraries
NodeJS along with ExpressJS
HTML, CSS, JavaScript
